

Sheep Handling Equipment

Manor Farm, Steeple Aston

Grant: £5,527 (40%)

A grant was awarded to farmers Sam & Charlotte towards the purchase of a fully-automated mobile sheep handling system. The equipment can identify each individual animal through a tag reader and automatically record information including weight, breeding, births, treatments and movements.

The new equipment will enable the sheep enterprise to become more efficient and improve animal welfare. This will reduce costs of the business and free up time to expand the flock, creating further employment.

Priority: (1) Increase farm productivity

Outputs over 3 years: 1 full-time job, wage bill increase £22,000,
1 new technique.
