

Fertiliser Spreader

RJR Contracting, Tetsworth

Grant: £29,400 (40%)

RJR Contracting, a farm contracting business, were awarded a grant towards a variable rate and GPS guided fertiliser spreader.

The specialist technology will enable users to control the amount of product that is being spread as well as being able to collect data about the field and crops for the farmer.

This will increase productivity of RJR Contracting as well as for the farmers and their crops. The environmental benefits include improved soil structure and less fertiliser being used. It will also maintain a source of income and employment for RJR Contracting throughout the year.

Priority: (2) Support micro and small businesses and farm diversification

Outputs over 3 years: 1 full-time job, wage bill increase £33,280
