

Farm Equipment

Buscot Wick Farm, Faringdon

Grant: £51,599 (40%)

A grant was awarded to farmer Philip Kinch of Buscot Wick Farm for the purchase of a direct drill, cattle mattresses and ruminant collars. The equipment will help the mixed dairy and arable farm to increase its productivity and profitability by improving crop establishment and cattle health and welfare.

The ruminant collars alert staff if a cow is showing signs of unusual activity in order to intervene quickly. Philip says that happy cows are more productive!

The farm is a strategic dairy farm for the Agriculture and Horticulture Development Board (AHDB) which encourages 'farmer to farmer' learning.

Priority: (1) Increase farm productivity

Outputs over 3 years: 3 new techniques
