

Firewood Processing & Delivery Equipment

Farm Firewood, Lower Farm

Grant: £32,591 (40%)

Farmers Robert and Julie were awarded a LEADER grant towards new equipment to process and deliver firewood harvested from their own woodlands. This will create a new income stream to help strengthen the farm business and safeguard a number of jobs.

The firewood is being delivered locally, shortening the wood chain and reducing carbon footprint. The woodlands will be managed carefully to ensure it is a sustainable source and remains a good habitat for wildlife.

The project is underway and the first logs are being delivered.

Priority: (6) Increase forestry productivity

Outputs over 3 years: 1 new product, wage bill increase
