

# Cheese Processing Equipment

## Norton and Yarrow Cheese

**Grant: £33,218 (40%)**

Norton and Yarrow Cheese had only been making goats cheese a couple of years when demand for their product was outstripping supply.

They received a LEADER grant towards the installation of a cheese processing facility on the farm site so they no longer had to travel to process their cheese. The project will help them to double their current capacity, produce a new product, reduce their carbon footprint and create jobs.

The project is complete and they started processing cheese in the new facility in January 2018.

**Priority:** (2) Support micro and small businesses and farm diversification

**Outputs over 3 years:** 3.5 full-time jobs, wage bill increase £70,263,
